

A+ Corporation, LLC designs, manufactures and markets Sample Conditioning Components, Knowledgeware, and Moisture and Corrosion Control products.

The Knowledgeware division provides information products and services that are based upon technical knowledge as applied to sample conditioning. These include GENIEware™ computer software, technical training courses from the A+ Technology Institute, Information Products and Custom Services.

GENIEware™

PhaseWizard simulates field conditions, draws phase diagrams and computes hydrocarbon dew point & BTU value based upon rigorous Equations of State (EOS) such as Peng-Robinson and Soave-Redlich-Kwong (SRK). PhaseWizard is licensed for \$500.00 per user and is the first of many GENIEware™ software tools for the analyzer specialist that A+ plans to develop.

A+ Technology Institute

The focus of the newly formed A+ Technology Institute is technical training related to sample conditioning. Any analyzer specialist, including analyzer OEM sales & support personnel can benefit from an A+ education. Training can be conducted at the Genie Training Institute or at a site provided by the customer, however the most economical means of attending live training uses the Internet and a telephone to eliminate the typical travel & living expenses. Pricing for classroom training is \$200-\$250 per

student (6 min.). Pricing for web-based training is \$100.00 to \$200.00 per student (3 min.). Testing and certification are included.

Immediately Available

- PhaseWizard 101 – Operation
- PhaseWizard 201 – Hydrocarbon Dew Point and its Impact on Sampling
- PhaseWizard 202 – Predicting Pressure Regulation Effects on Gas Sampling
- Sample Conditioning 301 – Sample Conditioning for On-Line BTU Analysis
- Natural Gas 201 – Hydrocarbon Dew Point

Coming Soon

- PhaseWizard 203 – Sample System Validation and Predicting Heat Tracing Effects
- Sample Conditioning 101 – Sample Conditioning Fundamentals
- Sample Conditioning 201 – Advanced Sample Conditioning
- Sample Conditioning 401 – Sample Conditioning for Moisture Analysis
- Sample Conditioning 501 – Sample Conditioning for H2S Analysis

Information Products

This includes all printed and electronically stored information. Over 20 PhaseWizard Application Briefs are immediately available for sale at \$20.00 each.

Custom Services

Even if you can't justify purchasing PhaseWizard because you need

just a few hydrocarbon dew points, cricondentherms, phase diagrams or simulations A+ can still help you. If you can provide the gas composition, A+ can create a report that provides any of this information for as little as \$50.00 to \$100.00.

The A+ Technology Institute can assist you in developing a program to provide initial, and continuing, training for your veteran or rookie analyzer specialists.

Additional information such as Application Notes are conveniently available from A+ Corporation, LLC. Please call (225) 644-5255, or send a request by e-mail to sales@geniefilters.com.
